Figure 10. A 3D visualization of the learned latent space. The latent space is a 100-dimensional vector space where each dimension corresponds to a latent variable. The latent variables are represented by colored spheres, and the latent space is visualized as a 3D grid.

Figure 10. A 3D visualization of the learned latent space. The latent space is a 3D volume where each point corresponds to a specific image. The color of each point indicates the probability of the image belonging to the 'train' class.

• 100% Natural • 100% Organic • 100% Sustainable

Figure 10. The four panels show the spatial distribution of the total energy density in the simulation box at  $t = 10$  (left),  $t = 20$  (middle),  $t = 30$  (right), and  $t = 40$  (far right). The color scale indicates the energy density from 0 to 1000 units.

Figure 10. A 3D visualization of the learned latent space. The latent space is a 100-dimensional vector space where each dimension corresponds to a latent variable. The visualization shows a 3D grid of points, where each point represents a specific combination of latent variables. The colors of the points represent the values of the latent variables, with blue representing low values and red representing high values. The grid is composed of many small cubes, creating a 3D effect.

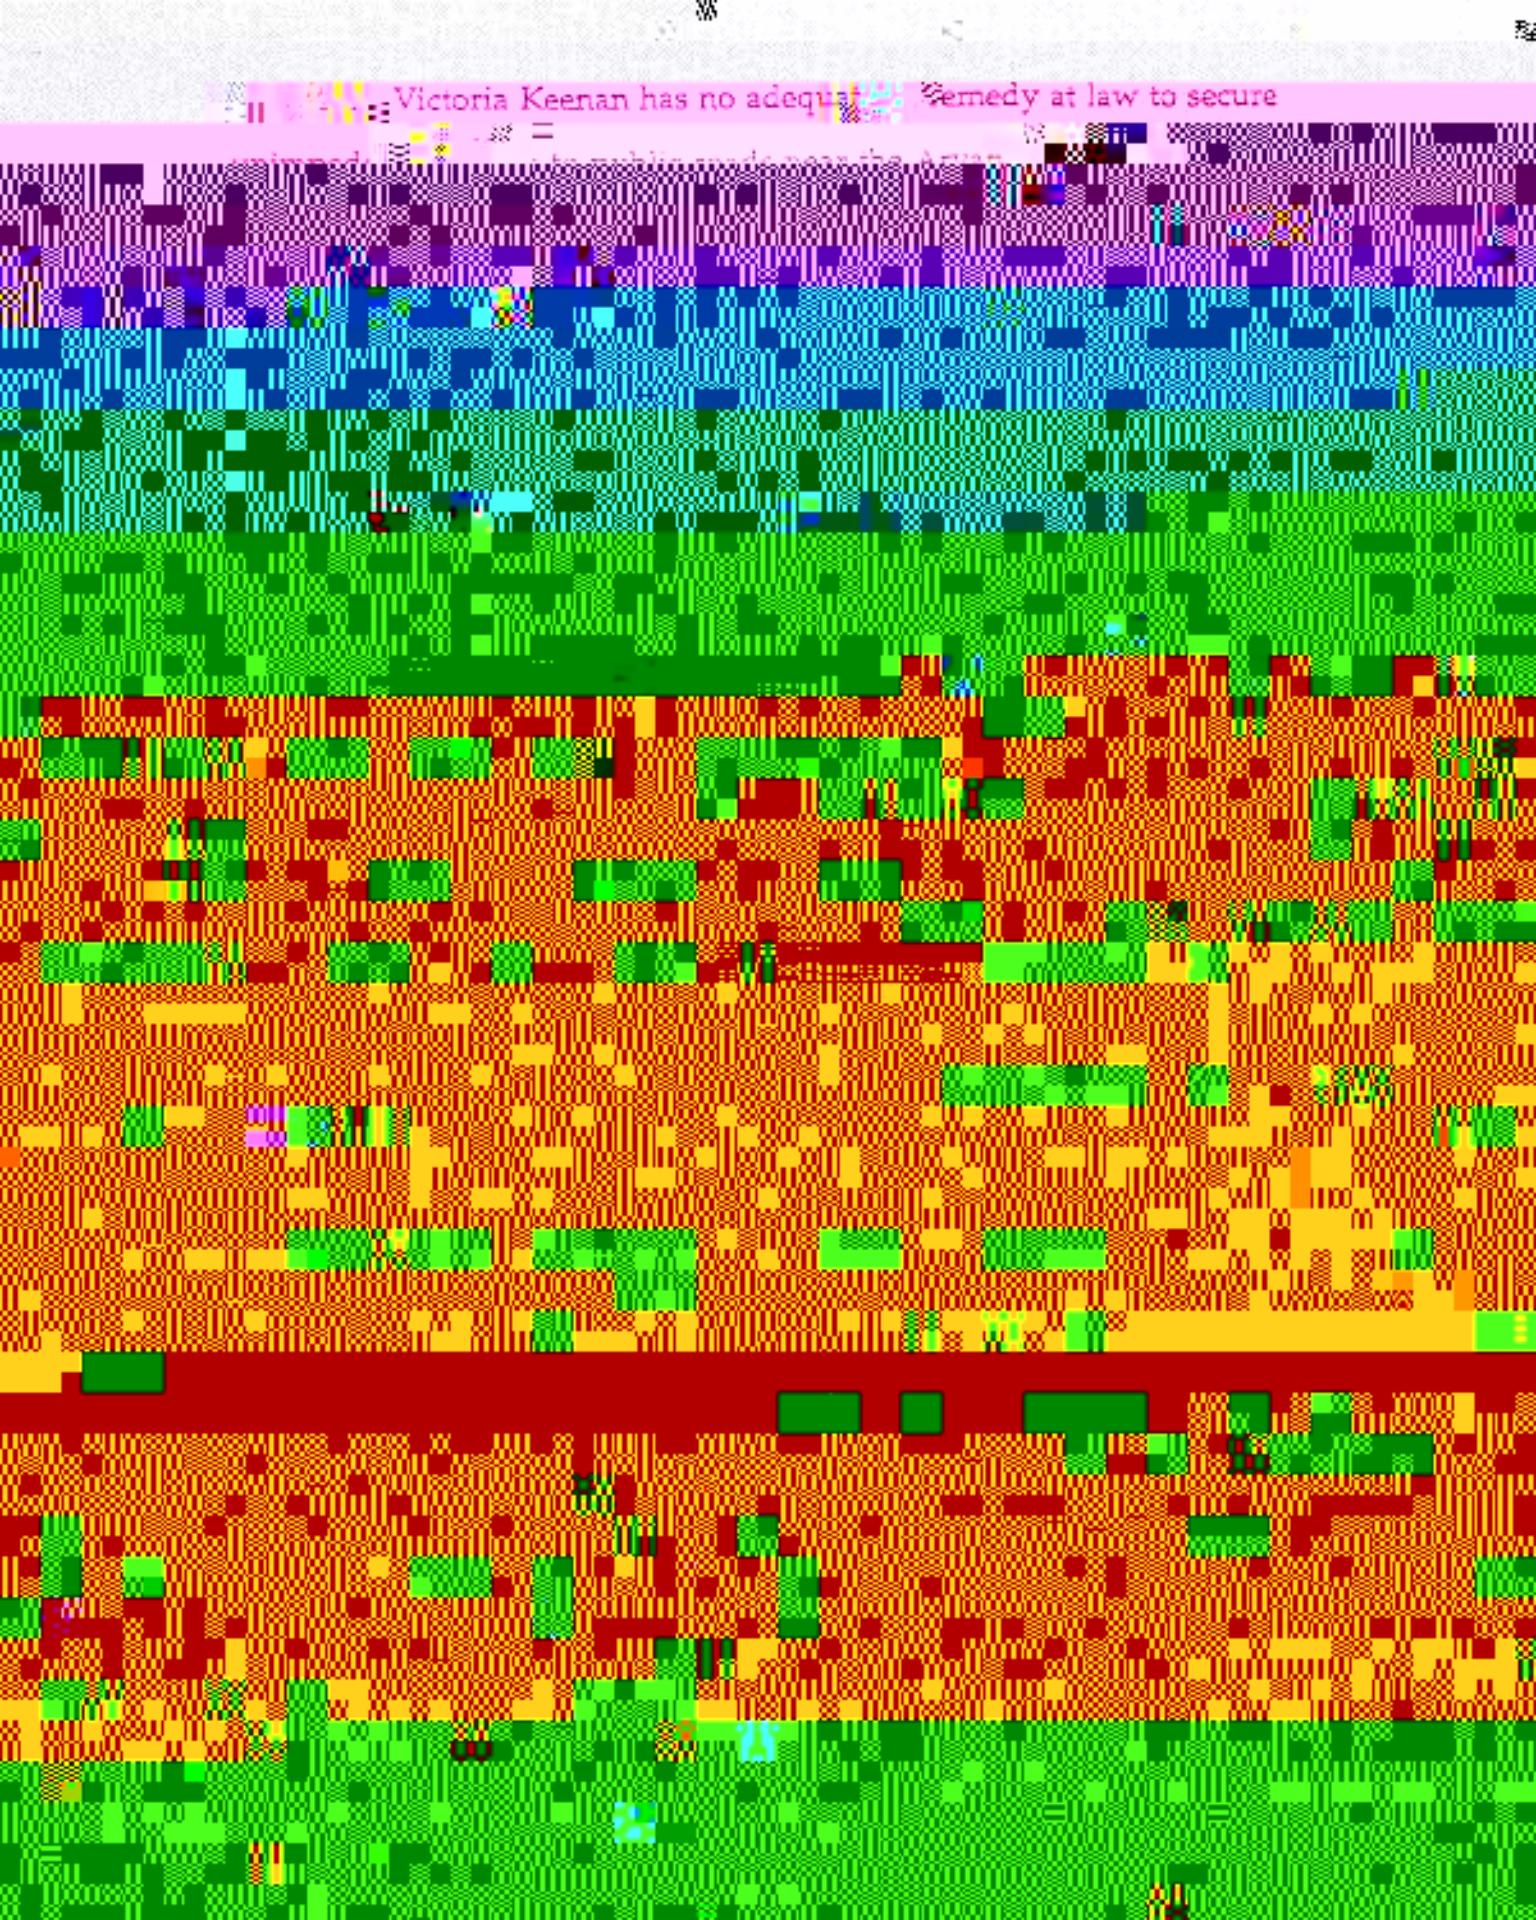

For more information about the study, please contact Dr. Michael J. Hwang at (310) 794-3030 or via email at [mhwang@ucla.edu](mailto:mhwang@ucla.edu).
